A Sensation Romance of Real Life. Dr. Levinger, a celebrated lawyer of the higher court at Vienna, in Austria, was a rew weeks ago intrusted with an uncommonly interesting case. An old nobleman, of impense wealth and a high position at the Imperial Court, fell in love with a beautiful young woman of low extraction, and persuaded her to live with him as his mistress. He sequestered his jewel in one of his castles in the country, in order to suffer less from the pangs of jealousy, and at the same time conceal from the world the interesting circumstances in which the thoughtless creature found herself. In May, 1841, the old Baron advised his love by letter that, in view of an ap-approaching event, he had made a codi-

cil to his will, wherein he had provided for his offspring with princely munifi-But before the letter reached its destination the Baron was struck by sudden death from spoplexy, and the party to whom it was addressed had given birth to a healthy boy. The Probate Court opened the testament, wherein the two legitimate daughters of the Baron were named as his heirs, but there was no vestige of the codicil. Out of respect for the former high position of the Baron in society, and to avoid scandal, the two heiresses supported his mistress and her child during

student of medicine at the University of

Berlin, and received his diploma as Doctor of Medicine in 1866.

His mother had carefully concealed from her son his illegitimate origin, and allowed him to believe that his father had allowed him to believe that his father had belonged to her own class, and that he had died many years ago. At that period one of the daughters of the old Baron, who had married a chamberlain of the Court, sought to engage a tutor for her son, a youth of sixteen years, and by one of those marvellous coincidences, which happen oftener in romance than in real life, her attention was thrown to the life, her attention was thrown to the young physician, who at that time was visiting the hospitals of Vienna. Her son being of a frail constitution, she was son being of a frail constitution, she was very glad to intrust his education to a young man who, by his peculiar studies, was enabled to carefully watch over his physical condition; and, without the least idea that she had engaged so near a relation. The young doctor was introduced into the family. He soon gained the confidence of his employers, and they intrusted him with many delicate transactions.

Among others they required him to examine their family archives and select the valuable papers from those which might be destroyed as useless. Pending this work he found a diary of the old Baron, which contained the whole history of the doctor's birth and the indication of the place where the father had tion of the place where the father had deposited the codicil. The yeung man at once communicated the circumstance at once communicated the circumstance to his mother, took possession of the codicil, which gave him a million of guilders, and, as the legitimate heirs of his father refused to comply with its stipulations, he commenced suit against them, after having in vain attempted to come to friendly terms. About the middle of May the case will be pleaded before the Imperial Court of Vienna, and, the amount bequeathed to the illegitimate child heing not in excess of what such child being not in excess of what such children are permitted to receive from a father in case there are legitimate children also, it is scarcely doubtful that the young physician will soon become a man

An English Officer in Canada Killed for

Montreal by the killing of Ensign Whit-taker of the British army, by young Chal-oner, on Wednesday. Whittaker seduced Miss Chaloner, last August, after having first put her under the influence of chloroform. A few weeks ag o he promised te marry her to save her from disgrace, but subsequently refused. Her father then went to a justice of the peace and instituted a soit against Whittaker for rape. The girl was sent for and her deposition was taken. While this was going on the brother entered, and learned for the first time of his sister's disgrace. He immediately left, and armed him-self with a revolver, and learning that Ensign Whittaker was at the skating rink, went there and fired a shot at him, saying at the same time, "You know what that was for." The first shot missed, and, as the officer was making a rush toward him to seize the revolver, he fired again, the ball entering the temple. Chaloner was immediately arrested, and now lies in jail. The almost unanimous ver-The Chaloner family are highly respectable, and the son is not of a quarrelsome disposition, and is but sixteen years of age. Easign Whittaker, at the last accounts, was still alive, but insensible. The brain oczes from the wound,

and recovery is impossible. A Quebec dispatch says: Miss Chaloner, sister of the accused, vesterday made a deposition before the Judge of the Sessions showing that she was criminally assaulted by Whittaker, in her own home, some time ago, while under the influence of chloroform or some other drug administered by him. Her mother was lying-in at the time, and he had previously promised her marriage. Their intimacy continued until her father, hearing bad accounts of Whittaker's behavior in and out of Quebec, forbade him the house. It is approved that the fact of this laws. upposed that the fact of this deposition having been made came to the knowledge of young Chaloner on the same after-noon, and that, influenced by the provo-

cation it afforded, he went to the rink to avenge his sister's dishonor. Mr. Frederick Charles Whittaker, the injured officer, is the son of Deacon Whittaker, of England, entered the army in 1865, and was a fine-looking young

man of about twenty-two.

It seems that one of the facts sworn to in Miss Chaloner's deposition is that Mr. Whittaker appointed last Friday evening for the celebration of their marriage by the Roman Catholic chaplain to the forces. The young lady and the officer went together to the door of the chapel, and when there he turned back and told her to inform the clergyman that he would return at another time.

Morganatic marriages are quite com-mon among the royal families on the con-tinent of Europe. The word morganic is said to be derived from the Gothic morg-jan, to curtail or limit, and is used to indicate a lower sort of matrimonial union, which as a civil engagement is completely binding, but fails to confer on the wife the title or fortune of her husband, and the first few years, and even provided her with the means for the boy's education.
But after awhile they lost sight of them, and finally abandoned them entirely.
Years passed by, and the illegitimate son became an intelligent and laborious the title or fortune of her husband, and sault, gazed about the children the right of succession.
This explanation is necessary, to understand the intelligence from St. Peterstand the intelligence from St. Peterstan

self and her descendants the title of Grant's Rominations and How They were self and her descendants the title of Countess of Beauharnais. The decree conferring this title sets forth that by the organic law of the Empire the Duke's title cannot pass to his children, nor can the title of Duchess be borne by his wife. It adds, however, that the marriage took place with the full consent of the Czar. This is assessed on the first consent of the Czar. This, it is asserted, is the first instance of the formal sanction of a morganic mar-riage in Russia, and it is conjectured that the Imperial recognition will be given to similar marriages that have heretofore taken place. Thus, the Grand Duchess Mary, who is the eldest daughter of the Czar Nicholas and mother of the Duke of Leuchtenberg, after the death of her first husband married morganatically Count Gregory Strogonoff. This latter marriage, it is asserted, will now be recognized.—Philadelphia Public Ledger.

President Johnson to His Home.
From the Union and American, 12th.]
The citizens of Greene county, Tennessee, met on Wednesday, March 3, 1869, at the Courthouse in Greenville, and were called to order by J. C. Beeks, who briefly stated the objects of the meeting to be to take steps to preperly and publicly manifest the esteem in which we hold our distinguished fellowcitizen, President Andrew Johnson, who is soon to return to his home in Greene-ville. James Britton, Esq., was called to the chair, and a committee, consisting of Messrs. H. H. Ingersoll, Edwin Henry, J. C. Beeks, David Fry and Samuel Lane, was appointed to report resolu-tions expressive of the objects and senti-ments of the meeting. An adjournment to the 4th then took place, at which time the committee reported the following resolutions, which were adepted by a

unanimous vote:

Whereas, President Andrew Johuson's term of office expires to-day, and we, a few of his fellow-citizens, assembled without regard to party, have learned with pride and pleasure that he is soon to return to his old home, which he was compelled to flee for safety in 1861, and from which he has ever since been detained by the discharge of onerous official duties; and whereas we deem it due to him and and whereas, we deem it due to him and tended to him in token of our appreciarendered by him to the State and to the Union in the various official position she has occupied; therefore,

Resolved. That we are happy to learn of his intention to make his home here among the friends of his youth and the scenes of his early conflicts and victories.

Resolved, That in President Andrew Mesotrea, That is Present a Ample Johnson we recognize a signal example of the triumph of perseverance and determination over all obstacles, and that his history affords a striking illustration of the benign and encouraging influence of our free institutions upon the indi-vidual citizen, however humble his birth

Resolved, That the people of this and adjoining counties, are cordially invited to be in Greenville upon the day of his return, and, disregarding party ties and considerations, join with us in extend-ing to him a hearty welcome back to the mountains of East Tennessee.

Resolved. That a committee be apthe proceedings of this meeting, ascertain and publish, as soon as convenient, the day of his arrival here, and make preparations to receive him in a becom-

On motisen, it was unanimously re-solved that James Britton be made Chairman of the Committee "to inform President Johnson of the proceedings of this meeting," etc. The chairman then appointed Edwin Henry, A. W. Walker, H. H. Ingersoll and John P. Haehsinger

A Reverend Humbug.

A few days since a man named John H. Robinson attended a religious meeting in Centre township, Buchanan county, and represented himself as being the Rev. Flowers, of this city. He occu-pied the pulpit, of course, and in due time began his discourse. He soon became exceedingly boisterous in his oratory, and at length commenced swearing like a pirate. The would-be worshippers were at first shocked, and then enraged at the imposition, and the imposter was arrested on the charge of disturbing a religious meeting. He was arraigned before 'Squire Parker yesterday, plead guilty, and was fined \$25 and costs.

We understand that two other informations of the same character hang over this man Rebinson. From all accounts he is an incorrigible sinner. He resides in Centre township, and moral sussion has long been tried on him, but to no avail, and it is now proposed to try the effect of legal sussion.—St. Joseph Union, 7th.

There was a strange and startling ex-hibition at Laconia, New Hampshire, a few Sundays ago. As the people were assembling for wership, a well dressed stranger ascended some ladders which still remained upon the new Unitarian Church, mounted to the very top of the steeple, surveyed for a few moments the landscape and those who were watching him in terrified groups, turned a somer-sault, gazed about a few moments more, descended to the ground, and walked out of town without attering a word, or man-of town without attering a word, or man-ifesting any emotion but of calm lovers, extra. She has been quite suc-stolldity. He is thought to have been an occasion, and makes a specialty of pro-

Received.

Don Piatt is responsible for the fol-owing, written from Washington : "Just as I entered the House the news of the selection made by the President of a Cabinet was announced. The first expression was one of blank amazement. t was the calm that precedes the storm. It broke out in a roar that sounded like the prolonged growl of wild beasts. The new Speaker rapped his gavel in a vain endeavor to restore order. Some Demo-crat moved a recess of ten minutes, "that the mourners might have time to recover," which carried amid loud laughter
from the Democratic side. The cave
immediately broke ranks, and, while
some gathered in groups, others ran
wildly to and fro. Jim Clayton, the
adipose of the clerk's office, was the most
conspicuous object, rolling like a big abig abig. conspicuous object, rolling like a big ship in a heavy sea, and the only one whose face carried a look of intense satisfaction All about, on every side, were scowls, and from every quarter came exclamations of surprise, scoiding and cursing. "Who in the h—l is Borie?" roared a

well-known Western member.
"I'll tell you that, if you'll tell me who
the devil is Hoar?"

"And that damned yard-stick to be Secretary of the Treasury."
"Thunder."

"Washburne-well, I'll be ---."
"Grant is busting things and no mistake. If he'd rake the bottomiess pit with a fine tooth comb, he could not get another such a lot together."

Terrible Earthquake.

Late East Indian papers give accounts of the late violent earthquake which shook various parts of Bengal between January 10th and 11th. It was most severely felt in Cachar and Assam. The carthquake was felt as far west of Cal-cutta as Dinapore. Cachar, where it was most severe, is on the line of volcano action which, stretching from the Eastern Himalayas, runs down the coast of Bermah, where there are several extinct volcanoes, to the eastern Archi-pelago, where volcano phenomena on a large scale are of frequent occurrence. At the latter place the earth seemed agitwenty feet high, tossing trees and buildings about, and making the hills reel as the convulsion passed. The river changed its course and ran upward for an hour, tossing the water fifty feet into the air and forming numerous water spouts. The earth opened in hundreds of places, vomiting up volumes of blue sand and water and enguifing houses cattle and men, in some cases closing over what it had swallowed, and in others remaining in yawning abysses, showing the roofs of houses twenty feet below the surface. The convulsion was felt over all of Lower Bengal at the same time. and continued with slight shocks for sev-

The parrot which exclaimed, on being taken into a room where there were a number of its species, "Good God, what a lot of parrots!" has been beaten by a "Polly" owned by some one living in the vicinity of Norwich, Conn. One day a gentleman called at his residence, and his daughter, on learning who it was, exclaimed: "Oh,dear! what has he come tion, and when the gentleman was ushered into the room where it was, screame out, "Oh, Lord! what the devil did you come for?" Another family near by owned a parrot which was very fond of all kinds of cake except johnny cake, and got a slice occasionally from the table. One morning there was nothing on the table to give "Polly" but a piece of johany cake, and it was placed before her with the remark that it must do for beachers. The hind was in the call of breakfast. The bird eyed it with evident disgust, turned it over, looked up to the one who had placed it before her, and exclaimed, "Oh, hell! nothing but

A Columbus (Mississippi) paper re-lates that a pompous old negro lately rode up to the home of a citizen of that place, and asked the favor of a word at the gate, as he couldn't well leave his

"Well, what is it ?" quoth the man of

owed anything to Moses Dunn, 'ceased. I'm de moderator ob de 'state now, and find plenty folks dat he owes, but it's hard work to find any dat owes him."

Two very eminent French physicians, Dra. Monneret and Grizole, were, the other day, at the sick bed of a patient. During the diagnosis they commenced quarreling about his disease. "I say it is typhoid fever," exclaimed one of them. "And I know it is not," replied the other. Unable to convince his colleague. Dr. Monneret finally exclaimed, "Ali right, then; the post mortem examinatien, I am sure, will show that I was Fancy the feelings of the poor patient.

A young woman in Chicago has invented a new branch of female useful-ness. She advertises that she will "give lessons in eviquette, and the way of con-versing with ladies, to any young gentle-man who does not feel at ease in the

FINLEY'S

PROOF

THE ABOVE CUT REPRESENTS THE FINLEY BEE HIVE, WITH THE UPPER A portion partially elevated, showing the position of the Honey Boxes. The lower section is shown with the door open; thus showing the position of the tubes. The above cut shows that the only entrance to the Hive is through the tubes, the lower ends of which rest upon the bottom board of the Hive, while the upper ends are in the center, as seen in the cut. The Hive is also provided with a Perforated Ventilator in such a manner as to ventilate it and at the same time prevent moths or other insects from entering it. It will be seen from the position of the tubes that the moth, or miller, will have to pass through the very heart of the family of bee before admittance would be guined within the Hive; and, from the known habits of the moth, will never be done; and if it were attempted, it would only insure its certain destruction. By having two or more Honey Boxes in the upper section, honey can be taken at any time without disturbing the bees or breaking the comb. This Hive is so arranged that the honey is always free from young bees, bee-bread or other impurities. The advantages of this Hivo over all others, are at once apparent, and wherever it has been tested it has rendered universal satisaction. Among the advantages are the following, to-wit:

1. It is the only moth-proof Bee Hive in existence, which of itself gives it pre eminence ver all others, as the moth is the greatest impediment to successful bee culture

2. It is the CHEAPEST of all Hives, as the principle can be applied to any kind of Hive, from the common sweet-gum to the courtliest palace, at a cost of not more than one dollar, which is quite an item these bard times.

3. Honey can be taken at any time, without disturbing the brood or the bees, and when taken is free from all impurities.

4. The lower section of this Hive is so constructed that the bees invariably build straight, regular brood-combs, and can build no other, as the bars are a uniform distance apart, and the sees MUST build to the bars.

5. This hive can be managed by any one of ordinary intelligence, and does not require any ore skill than the ordinary hive.

6. With this hive you are not liable to over rob your bees, as the lower section of the hive

DIRECTIONS FOR THE MANAGEMENT OF THE FINLEY BEE HIVE:

1. Remove the honey baxes from the upper section; then take a piece of new domestic and tack it over the top of the lower section of the hive in such a manner as to prevent inc 2. Remove the ventilator from the bottom of the hive, when the bees can be hived the

same as in the "old gum" hive. After your bees are hived, be sure to leave the honey boxes out, which will insure, invariably, straight, regular brood-combs (which is always essential to uccessful bee culture), as the bees can build their combs only to the bars, as the muslin will give way whenever they attempt to fasten comba to it. 3. After the lower sestion of the hive is filled with comb within two inches of the bottom

fit the hive, under the cloth to keep the bees de an-place your honey boxes in the hive and slip the tin out (to take honey, use the tin the same way, and you can remove the honey boxes without any trouble), and you will have all surplus honey free from impurities. 4. Place the hive under shelter, where it can have the advantage of the air and the norning sun. Partially remove the ventilator every few days, about noon, to permit the bees to remove any dead beer from the hive, but be sure to close it before evening or you will let

oard, remove the cloth entirely from the hive-by sliding a piece of tin or thin plank, cut to

5. The winter management the same as the old Hive.

6. At the approach of winter remove the Hive to a warm place : partially remove the Ven-

County Rights for Sale on Liberal Terms.

In order to introduce the Hive specially at as many points as possible EXTRA BAR. GAINS will be given to parties buying County Rights BEFORE next "Bee Season." Will trade County or Farm Rights for bees (in old gums), for lumber for making Hives, for the MAKING of Hives to order, for good Farm Stock, Wheat, Rye, Corn and Shell Oats (sacked). Hay (baled), Grass Seeds, or any products of the farm delivered in good order at shipping points, (being farmers, we can use such things to advantage,) or for any valuable property.
